International Business and Networking Platform for Interactive Media Companies

BerlinBalticNordic.net is the network and exchange platform within the interactive media industry in Berlin and the Nordic and Eastern European countries with a focus on games, start-ups and digital media.

The interactive media industry is booming, not only in Berlin. BerlinBalticNordic.net has an international reach and brings together start-ups, digital pioneers and members of the gaming industry. The programme started out as a German-Polish collaboration. Today, members from Berlin, Nordic and Eastern European countries all benefit from contacts, sharing of knowledge, finding of new funding opportunities and business relationships it offers.
