**Merging the Film
and TV Industry**

Merging the Film and TV Industry

Berlin and Brandenburg are becoming increasingly popular as settings and shooting locations for both German and international production companies.

production:net berlinbrandenburg brings together representatives from the industry, offering support before and during filming. We network producers, studios, technical service providers, broadcasters and platforms. Networking events and recruitment days also bring together industry members with representatives from politics and relevant institutions – so that Berlin can remain a hot location both on and off camera.
